Yes, Thank you Molly for your support.

I was able to download the GS Data Tool Registration Form from the website you indicated. I completed the form for our (expected) first project site and sent it into the email address indicated. I plan to complete and submit the form for additional project sites in the coming days.

Thank you again and happy Monday.

Best Regards,
-Rebecca

Molly, I appreciate your help on this. My request for access was related to a series of projects Schlumberger is assisting Clean Energy Systems (CES) on. Our scope is to assist CES prepare Class VI applications for sequestration as part of the projects. After discussions with David Albright on October 17, we decided the appropriate process will be for the CES Project Manager, Rebecca Hollis, be the point for the GSDT project accounts. So, Rebecca is registering the project accounts now. Regards, Wayne

Wayne,

I apologize for the confusion the old instructions caused. The correct link to the GSDT log-in page is provided below. The GSDT Registration Form is also available for download here. The form includes instructions for acquiring credentials, which are assigned on a per-project basis. Please let me know if there are any issues gaining access to the GSDT or with the tool in general.

Molly,

Thanks for reaching out. I have a meeting tomorrow morning (10/17) with Region 9 Manager, David Albright, to discuss submitting an application for a UIC Class VI permit. We will need access to the templates and resources available at that site. I followed published instructions on how to request access, but apparently those instructions are obsolete. Will you be able to help me out?!

Regards,
Wayne

Hello,

A Geologic Sequestration Data Tool (GSDT) account was requested on behalf of Wayne Rowe at this email address. The mechanism and URL through which this request was made is outdated. I work in the Underground Injection Control Program at EPA headquarters and manage the GSDT. Is there something I can help you with?

Thank you,
Molly
